CAREER OBJECTIVE

Motivated Java Developer (MCA, 2026) seeking a fresher role to apply strong backend development, problem-solving, and web skills in a collaborative engineering team. Eager to contribute to real-world projects and grow through hands-on experience.

TECHNICAL SKILLS

- Programming Languages: Java, SQL, Python
- Web Technologies: HTML5, CSS3, JavaScript (ES6+)
- Database: MySQL – CRUD operations, schema design, JDBC integration
- Frameworks/Concepts: Core Java – OOP, Collections, Exception Handling
- Tools: VS Code, Git, GitHub

EDUCATIONAL QUALIFICATION

- Anjalai Ammal Mahalingam Engg. College — MCA, 24–26, CGPA: 8.20
- Bon Secours College for Women — BCA, 2021–24, CGPA: 8.5
- Girls Christian Hr. Sec. School — 12th (HSC), Maths & CS, 2020–21, 65%
- Girls Christian Hr. Sec. School — 10th (SSLC), 2018–19, 55%

INTERNSHIP EXPERIENCE

Java Developer Intern — SSRTC Institute, Papanasam — Jan 2025 – Present

- Developed responsive web pages using HTML, CSS, JavaScript, and Core Java.
- Integrated MySQL databases with JDBC for data storage and retrieval.
- Debugged and optimized application code, reducing runtime errors in existing modules.
- Followed Git-based version control and participated in senior developer code reviews.

PROJECTS

Banking System Website — Java, HTML, CSS

- Web-based banking application with account creation, fund transfer, and transaction history pages using Java backend and HTML/CSS frontend.

Neural Network Methodology for Anticipating Bone Fracture — Python, TensorFlow, Keras, OpenCV, Tkinter, MySQL

- Built a CNN-based diagnostic system to detect bone fractures from X-ray images, covering the full pipeline from preprocessing to classification.
- Applied grayscale conversion, DCT-based noise removal, and watershed segmentation to isolate the fracture region from raw X-ray scans.
- Extracted texture features using GLCM (Gray-Level Co-occurrence Matrix) and trained a Conv1D-based CNN model for fracture classification.
- Designed a Tkinter GUI for image upload and result display, with MySQL used to store patient records and prediction history.

PROBLEM SOLVING

- Solved 100+ coding problems on platforms like GeeksforGeeks covering arrays, strings, and OOP.
- Independently identified and fixed logic errors in MySQL-JDBC integration during internship, reducing query failures.
- Designed and implemented the Banking System project from scratch, overcoming challenges in Java session handling and form validation.

CERTIFICATIONS

- Python Programming Certification – 2024 (Python fundamentals)
- JavaScript & Frontend Development Certification – 2024 (HTML5, CSS3, responsive web design)

LANGUAGES KNOWN

Tamil (Native) | English (Professional Proficiency)
